SECTION 2

2 Our understanding of the need

Positions, orders and commissions live in four back offices. Each party reconciles copies, and month-end starts with gaps to explain.

2.1 What we heard

[Client name] distributes unit-linked contracts from [X] insurers. Subscriptions, switches and withdrawals travel by file, and each step re-keys what the previous one sent. The insurer stays the source of truth; what can change is where that truth is written.[1]

- Orders are sent by file and confirmed [X] days later.
- Commission bases are computed on both sides and disputed by email.

DECISION REQUIRED

Which insurer joins the pilot. Owner: [Name], by [Date].

2.1.1 What stays, what changes

Item	Today	Status
Orders	File, re-keyed at each step	● In scope
Client data	Held by the insurer	○ Out of scope

Table 2.1: Scope of the register. See section 4.2 for the full list.
